JOURNAL of ANALYTICAL and APPLIED PYROLYSIS

Contents of Volumes 32 and 33

Special Issue: Selected proceedings of the 11th International Symposium on Analytical and Applied Pyrolysis, Nagoya, Japan, May 30–June 3, 1994. Part I

Preface xi

Plenary lecture

Analytical pyrolysis — past, present and future
S. Tsuge (Nagoya, Japan) 1

Recycling and processing

Production of harmful materials from synthetic polymers under pyrolysis
M. Blazsó (Budapest, Hungary) 7

Olefins from polyolefins and mixed plastics by pyrolysis
W. Kaminsky, B. Schlesselmann and C. Simon (Hamburg, Germany) 19

Kinetic models for the thermal degradation of heterogeneous materials
R. Font, A. Marcilla, A.N. García, J.A. Caballero and J.A. Conesa (Alicante, Spain) 29

Comparison between the pyrolysis products obtained from different organic wastes at high temperatures
R. Font, A. Marcilla, A.N. García, J.A. Caballero and J.A. Conesa (Alicante, Spain) 41

Geopolymers, sediments and soils

Flash pyrolysis of coals. Temperature-dependent product distribution
J.V. Christiansen (Roskilde, Denmark), A. Feldthus (Værløse, Denmark) and L. Carlsen (Roskilde, Denmark) 51

Characterization of extraterrestrial high-molecular-weight organic matter by pyrolysis–gas chromatography/mass spcetrometry
T. Murae (Fukuoka, Japan) 65

Characterization of sinking particles in the ocean by pyrolysis–gas chromatography/mass spectrometry
R. Ishiwatari, S. Yamamoto (Tokyo, Japan) and N. Handa (Nagoya, Japan) 75

Composition, stability and turnover of soil organic matter: investigations by off-line pyrolysis and direct pyrolysis–mass spectrometry
P. Leinweber (Vechta, Germany) and H.-R. Schulten (Wiesbaden, Germany) 91

The three-dimensional structure of soil organo-mineral complexes studied by analytical pyrolysis
H.-R. Schulten (Wiesbaden, Germany) 111

Biological, organic and natural products

Determination of sulfur in biologically important substances by pyrolysis–gas chromatography
S.Y. Choi (Yokohama, Japan), M.G. Kim (Chunchen City, Korea) and H. Inoue (Yokohama, Japan) 127

0165-2370/95/$09.50 © 1995 – Elsevier Science B.V. All rights reserved

Thermal decomposition products of aspartame as determined by pyrolysis–gas chromatography/mass spectrometry
G.C. Galletti (Reggio Calabria, Italy), G. Chiavari and P. Bocchini (Bologna, Italy) 137
Application of pyrolysis–gas chromatography to the study of thermal alteration of chlorophyll-a — effect of clay minerals
M. Ishiwatari, R. Ishiwatari, H. Sakashita and T. Tatsumi (Tokyo, Japan) 153
Azirines from the flash vacuum pyrolysis of oximes
N.R. Reartes, G.I. Yranzo, J.D. Pérez (Córdoba, Argentina), I. Iwataki and H. Adachi (Tokyo, Japan) 161
Indirect estimation of asbestos concentration due to vehicles in particulate matter in the atmosphere and on roads by pyrolysis–gas chromatography
T. Saito (Kanagawa, Japan) 171
Rapid detection of Verocytotoxin production status in *Escherichia coli* by artificial neural network analysis of pyrolysis–mass spectra
P.R. Sisson, R. Freeman (Newcastle upon Tyne, UK), D. Law (Manchester, UK), A.C. Ward and N.F. Lightfoot (Newcastle upon Tyne, UK) 179
Analysis of bone marrow from patients with acute leukemia by high resolution pyrolysis–gas chromatography
L. Tan, F. Zhong, X. An, P. Shen, B. Chen, T. Zheng and H. Long (Beijing, People's Republic of China) 187
Classification of hashish by pyrolysis–gas chromatography
M. Hida, T. Mitsui (Nagoya, Japan), Y. Minami (Osaka, Japan) and Y. Fujimura (Kasugai, Japan) 197
Determination of the total amount of morphine alkaloids in opium by pyrolysis–gas chromatography using principal component analysis
T. Mitsui, M. Hida (Nagoya, Japan) and Y. Fujimura (Kasugai, Japan) 205
Metal-catalyzed two-stage pyrolysis. 2. Role of different catalysts in the production and composition of ethylene/propylene-enriched gases
I.K. Basily (Mansoura, Egypt) 213
Upgrading heavy ends into marketable products. New concepts and new catalysts for two-stage catalytic pyrolysis
I.K. Basily, E. Ahmed and N.N. Ibraheam (Mansoura, Egypt) 221
Headspace gas chromatography analysis of uncombusted gasoline diluent in used gasoline engine oils
M. Ichikawa, N. Nonaka, M. Nomura, I. Takada and S. Ishimori (Hamamatsu, Japan) ... 233

Subject Index 245

Special Issue: Selected proceedings of the 11th International Symposium on Analytical and Applied Pyrolysis, Nagoya, Japan, May 30–June 3, 1994. Part II

Preface ix

Cellulose, lignin and wood
Pyrolysis mechanisms of lignin: surface-immobilized model compound investigation of acid-catalyzed and free-radical reaction pathways
P.F. Britt, A.C. Buchanan, III, K.B. Thomas and S.K. Lee (Oak Ridge, TN, USA) 1
Linking of pyrolysis–chemical ionisation mass spectrometric and monomer compositional data of *O*-(2-hydroxyethyl) celluloses by canonical correlation analysis
P.W. Arisz, G.B. Eijkel and J.J. Boon (Amsterdam, The Netherlands) 21

Paper waste-water analyses by pyrolysis–gas chromatography/mass spectrometry during biological decolorization with the fungi *Coriolopsis gallica* and *Paecilomyces variotii*
A.M. Calvo (Madrid, Spain), G.C. Galletti (Gallina, Italy) and A.E. González (Madrid, Spain) 39
Classification of Japanese softwood species by pyrolysis–gas chromatography
K. Kuroda and A. Yamaguchi (Ibaraki, Japan) 51
Pyrolysis–gas chromatography/mass spectrometry of milled wood lignin of two Chilean woods naturally decayed by *Ganoderma australe*, *Phlebia chrysocrea* and a brown-rot fungus
M.C. Terrón, M.L. Fidalgo (Madrid, Spain), G.C. Galletti (Gallina, Italy) and A.E. González (Madrid, Spain) 61

Synthetic polymer analysis and characterization
In-product environmental protection: evaluation of chemical emissions from resin fortified resistance spot welding in the automobile industry. Part I. Thermal analysis/mass spectrometry and laboratory pyrolysis measurements with the German VCI oven
G. Lörinci, I. Gebefügi, G. Matuschek and A. Kettrup (Oberschleissheim, Germany) 77
In-product environmental protection: evaluation of chemical emissions from the spot welding joining technique in the automobile industry. Part II. Laboratory pyrolysis measurements with a welding chamber
G. Lörinci, I. Gebefügi (Oberschleissheim, Germany), G. Kötting, W. Hilla (Ingolstadt, Germany) and A. Kettrup (Oberschleissheim, Germany) 91
Compositional and sequential analysis of poly(ethylene–tetrafluoroethylene) by pyrolysis–gas chromatography
T. Isemura, Y. Jitsugiri and S. Yonemori (Yokohama, Japan) 103
Direct and rapid characterization of *para*-formaldehydes by pryolysis–gas chromatography/chemical ionization mass spectrometry
Y. Matsushima, H. Nagoshi and H. Ohtani (Nagoya, Japan) 111
Characterization of stereoregular polystyrenes by pyrolysis–gas chromatography
T. Nonobe, H. Ohtani (Nagoya, Japan), T. Usami, T. Mori, H. Fukumori (Yokkaichi-city, Japan), Y. Hirata (Toyohashi, Japan) and S. Tsuge (Nagoya, Japan) 121
Thermogravimetry/mass spectrometry analysis of the process for removing binder polymer from ceramics obtained by injection molding
T. Tsuneto, Y. Murasawa, M. Nagata (Yokkaichi, Japan) and Y. Kubota (Tsukuba, Japan) 139
Gas chromatography of styrene oligomers using a Curie-point pyrolyzer
M. Wada, S. Fujishige, S. Uchino and N. Ohguri (Tokyo, Japan) 149
Characterization of epoxy resins cured with dicyandiamide in the presence of imidazole catalysts by high-resolution pyrolysis–gas chromatography
T. Yamada, T. Okumoto (Aichi, Japan), H. Ohtani and S. Tsuge (Nagoya, Japan) 157
Effects of solvents and inorganic salts on the reactive pyrolysis of aromatic polyester in the presence of tetramethylammonium hydroxide studied by pyrolysis–gas chromatography/mass spectrometry
Y. Ishida, H. Ohtani and S. Tsuge (Nagoya, Japan) 167
Compositional analysis of multicomponent acrylic resins by pyrolysis–capillary gas chromatography
S. Mao, H. Ohtani and S. Tsuge (Nagoya, Japan) 181

Polymer degradation mechanisms
Linear-temperature programmed pyrolysis of thermoresistant polymers — mass and FT-IR spectrometries. Part 3. Poly(1,4-phenylene terephthalamide) and aromatic polyimides
D.O. Hummel, S. Göttgens, U. Neuhoff and H.-J. Düssel (Cologne, Germany) 195
Thermal behavior and degradation mechanism of brominated polystyrenes
F. Bertini, G. Audisio (Milan, Italy) and J. Kiji (Tottori, Japan) 213
Thermal degradation of polybenzimidazopyrrolones
Z. Jiang, X. Jin, X. Gao, W. Zhou, F. Lu (Beijing, China) and Y. Luo (Guangzhou, China) 231

Thermal degradation studies of poly(vinyl chloride) and ethylene–vinyl chloride copolymer
S. Mayeda, N. Tanimoto, H. Niwa and M. Nagata (Yokkaichi, Japan) 243
Fast thermolysis/FT-IR studies of fire-retardant melamine–cyanurate and melamine–cyanurate containing polymer
Y. Nagasawa, M. Hotta and K. Ozawa (Nagoya, Japan) 253
Thermal degradation mechanism of α,γ-diphenyl alkyl allophanate as a model polyurethane by pyrolysis–high-resolution gas chromatography/FT-IR
N. Yoshitake (Fukuoka, Japan) and M. Furukawa (Nagasaki, Japan)..... 269
